

# Coder Academy Assessment: ISK1001 Professional Documentation

We are team 02, consisting of the following members :

- Zali ([zalirae](#))
- Simona ([ChiSimo](#))
- Courtney ([c-joss](#))

The purpose of this assessment is to showcase our understanding, knowledge and skills in a professional and collaborative setting. Working together as a group and alongside other groups to give and receive feedback on our chosen application.

## Our Project

For this assessment we chose to use our group member Zali's python project, a Gardening App. Originally developed for a previous assignment within the Coder Academy Dev1001 course.
